

# LIVE BELOW THE LINE

## RECIPE GUIDE

Living on less than £1 a day for food and drink is not easy but it is possible. Across the globe 1.4 billion people do it everyday for everything- food, drink, healthcare, education, travel, everything.

The eating and drinking is the easy bit, but shopping for groceries on such a tight budget is alien to many of us. You, like us, probably don't use the cheapest supermarket for your weekly shop but instead the one most convenient to where you live. That's why we've created a recipe guide, not based on daily amounts but weekly amounts to give you some idea of what you can buy.

Shopping around is key. We've used some of the most well known and available supermarkets such as Asda and Tesco to get our ingredients. But all major supermarkets (and some local) will have the items below, at a cheap price.

## MENU 4

This menu is aimed at people who would rather have two meals a day rather than three. Although, we'd never advise skipping meals as a way to manage on £1 a day, eating larger portions across the two meals instead of three smaller ones is fine. Having two meals a day instead of three means you can budget more for them, but you will still be limited for choice.
